

HIGH CHAIR UP!

Design and comfortable use for many years to come, are combined in our high chair Up! An asset for your child as well as for your interior. This ergonomic chair is height adjustable and made of high-quality solid beech. Obviously, it meets all Australian quality and safety standards.

KIDSMILL

Dutch design nursery furniture for babies and kids

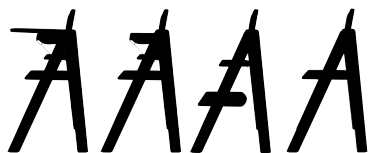

From birth

Thanks to the new-born seat your baby can join the dinner table from birth. You can simply click the base frame on the Kidsmill Up! Do you prefer your baby low to the ground? Click the base frame on the rocker frame.

Grow up

Practical! As a high chair the Kidsmill Up! can be used from six months and it grows along with your child.

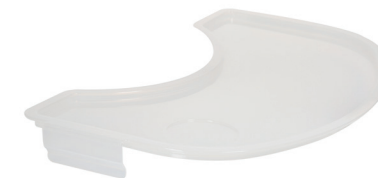

Fits into any interior

The Kidsmill Up! is available in several colors. Which one will be yours?

The extender with the integrated wheel is especially designed with safety in mind. When your child pushes itself away from the table, the chair will not topple, but it will move backwards.

Dinner tray & tray top

Pop it in place and let the feast begin! With the dinner tray for the high chair Up! you and your baby can enjoy your meals together at table height. The dinner tray is available in the same colours as the high chair Up!. The transparent tray is a practical accessory to attach to the tray top to make sure the lovely wooden finish of your chair will not be damaged. When your family meal is over you simply just remove the tray top and wash the mess off.

Cushion sets

Comfortable, soft and beautifully designed. The original cushion set completes the high chair Up! and offers your child optimum comfort. Available in several colours.
